

Quick-Start Solutions • Lasting Results

Overview

This course is designed to provide students with an understanding of the fundamental concepts of the HP Connect-IT application. The main focus of this course is on the operational-level process activities and supporting methods and approaches to executing these processes in a practical, hands-on learning environment. This course will provide the detailed lessons on all of Connect-It features and how to maximize the tool as much as possible.

Objectives

- Understand the purpose of Connect-It and the benefits involved
- Understanding the main components and integration connectors of HP Connect-It
- Understand how to read and create scenario code to perform actions.
- How to use HP Connect-It schedules and features
- Effectively use HP Connect-It to create integration points for various different products

Requirements

- There is no minimum mandatory requirement but experience in SQL programming is desirable
- Familiarity with the different integration connectors is extremely helpful
- General knowledge of IT operations, technology tools & products

Duration

- 4 days

Intended Audience

- *Asset Manager Administrators*
- *DDMi Administrators*
- *Application developers*
- *Users and Administrators*

Materials

LIST OF ITEMS NEEDED FOR COURSE, IF ANY

- *Projector and access to conference room/class room*
- *Individual work stations for each student*
- *Internet Connectivity and VPN access*
