

Combined HP Asset Manager & Connect-It Course

Quick-Start Solutions • Lasting Results

Overview

This course is designed to provide Asset Manager administrators with an understanding of the fundamental concepts, day-to-day operation and tactical skills involved in administering the HP Asset Manager environment, including integrations via HP Connect-It.

The main focus of this course is on the operational-level process activities and supporting methods and approaches to executing these processes in a practical, hands-on learning environment. This course will include the detailed lessons on all of Connect-It features and how to maximize the tool as much as possible.

Objectives

- Understand the function of Asset Manager and Connect-It for IT Asset Management
- Understand the architecture, integrations and system-level components of the HP Asset Management toolset
- Learn how to configure and customize HP Asset Manager to meet functional and/or business-level requirements
- Understanding the main components and integration connectors of HP Connect-It
- Understand how to read and create scenario code to perform actions
- How to use HP Connect-It schedules and features
- Effectively use HP Connect-It to create integration points for various different products

Requirements

- There is no minimum mandatory requirement but familiarity with SQL programming is desirable
- Familiarity with the different integration connectors is extremely helpful.
- General knowledge of IT operations, technology tools & products

Intended Audience

- *Asset Manager Administrators*
- *DDMi/UD Administrators*
- *Application Developers*
- *Users and Administrators*

Materials

LIST OF ITEMS NEEDED FOR COURSE, IF ANY
